

# Spray Foam Insulation Calgary

## Spray Foam is...

**HEALTHIER**

*Helps those with allergies & asthma*  
*Reduces airborne moisture*  
*Minimizes mold growth*

Sunny South Insulators is the #1 Spray Foam Insulation company in Calgary, Lethbridge and surrounding area since 1979. We specialize in home and commercial insulation, attics, basements, garages, steel buildings, renovations.

# Spray Insulation Calgary

The "new" Sunny South was created in 2004 with a new Icynene line of foam products. Sunny South is Icynene's exclusive Southern Alberta distributor ([www.icynene.com](http://www.icynene.com)). In the last few years, Sunny South has experienced unprecedented growth because of the demand for energy efficient insulation solutions. New spray rig equipment and trucks plus sales and operating staff are now in place to meet those needs.

## **Spray Foam is...**

**QUIETER**

*Minimizes sound transmission*  
*Seals small openings*  
*Encapsulates airborne sound transfer*

# Insulation Calgary

Sunny South has also added thermal imaging camera technology which shows the precise location of air leakage in existing structures – leakage which results in poor building performance because the existing insulation has not sealed the building.

## **Spray Foam is...**

**ENERGY EFFICIENT**

***Reduces energy bills up to 50%***

***Maintains indoor temperature***

***Minimizes air leakage***

***No loss of R-value over time***

# Insulation Companies Calgary

You can trust the experience of Sunny South experts. 'Hard Foam' works best for some applications. 'Soft Foam' is better suited to others. When you show us your needs, we'll explain the benefits and how to attain true energy efficiency.
